

Programming Fundamental

Exploring

Array & Its Length

```
<?php
```

```
$x = array("Ubi", "Wortel", "Kol");
```

```
echo "Saya suka " . $x[0] . ", ";
```

```
echo $x[1] . " & " . $x[2] . " .";
```

```
echo "<br><br>";
```

```
echo count($x);
```

```
?>
```

Loop Through an Indexed Array

```
<?php
```

```
$pet = array("Kucing", "Kelinci", "Ikan");  
$pjgarray = count($pet);
```

```
for($x = 0; $x < $pjgarray; $x++) {  
    echo $pet [$x];  
    echo "<br>";  
}
```

```
?>
```

Associative Arrays

```
<?php
```

```
$usia = array("Andi"=>"20",  
"Budi"=>"21", "Caca"=>"22");
```

```
echo "Andi " . $usia['Andi'] . " th<br>";  
echo "Budi " . $usia['Budi'] . " th<br>";  
echo "Caca " . $usia['Caca'] . " th<br>";
```

```
?>
```

Loop Through an Associative Array

```
<?php
```

```
$umur = array("Andi"=>"20",  
"Budi"=>"21", "Caca"=>"22");
```

```
foreach($umur as $x => $nilai_x) {  
echo "Key= " . $x . ", Value= " . $nilai_x;  
echo "<br>";  
}
```

```
?>
```

Sorting Array

SORT()
RSORT()

KSORT
KRSORT()

ASORT()
ARSORT()

SORT() Ascending Sorting Array

```
<?php
```

```
$nama = array("Budi", "Andi", "Caca");
```

```
echo "Urutan elemen array sebelum disortir:<br>";
```

```
echo $nama[0] . "<br>";
```

```
echo $nama[1] . "<br>";
```

```
echo $nama[2] . "<br><br>";
```

```
sort($nama);
```

```
echo "Urutan elemen usai disortir SORT():<br>";
```

```
echo $nama[0] . "<br>";
```

```
echo $nama[1] . "<br>";
```

```
echo $nama[2] . "<br><br>";
```

```
?>
```

RSORT() *Descending Sorting Array*

```
<?php
```

```
$nama = array("Budi", "Andi", "Caca");
```

```
echo "Urutan elemen array sebelum disortir:<br>";  
echo $nama[0] . "<br>";  
echo $nama[1] . "<br>";  
echo $nama[2] . "<br><br>";
```

```
rsort($nama);
```

```
echo "Urutan elemen usai disortir RSORT():<br>";  
echo $nama[0] . "<br>";  
echo $nama[1] . "<br>";  
echo $nama[2] . "<br><br>";
```

```
?>
```

KSORT() *Ascending Sorting Array by Key*

```
<?php
```

```
$nama = array("Budi"=>"19", "Andi"=>"21",  
"Caca"=>"20");
```

```
echo "Urutan sebelum disortir:<br>";  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
echo "<br>Urutan KSORT:<br>";  
ksort($nama);  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
?>
```

KRSORT() *Descending Sorting Array by Key*

```
<?php
```

```
$nama = array("Budi"=>"19", "Andi"=>"21",  
"Caca"=>"20");
```

```
echo "Urutan sebelum disortir:<br>";  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
echo "<br>Urutan KRSORT:<br>";  
krsort($nama);  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
?>
```

ASORT() *Ascending Sorting Array by Val*

```
<?php
```

```
$nama = array("Budi"=>"19", "Andi"=>"21",  
"Caca"=>"20");
```

```
echo "Urutan sebelum disortir:<br>";  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
echo "<br>Urutan ASORT:<br>";  
asort($nama);  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
?>
```

ARSORT() *Descending Sorting Array by Val*

```
<?php
```

```
$nama = array("Budi"=>"19", "Andi"=>"21",  
"Caca"=>"20");
```

```
echo "Urutan sebelum disortir:<br>";  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
echo "<br>Urutan ARSORT:<br>";  
arsort($nama);  
foreach($nama as $key => $value) {  
echo $key . "&nbsp;" . $value . "<br>";}
```

```
?>
```

Multidimensional Array

```
$motor = array(  
array("Honda",22,18), array("Suzuki",15,13),  
array("Yamaha",5,2), array("Ducati",17,15)  
);
```

```
echo $motor[0][0].": Stok: ".$motor[0][1];  
echo ", Terjual: ".$motor[0][2].".<br>;
```

```
echo $motor[1][0].": Stok: ".$motor[1][1];  
echo ", Terjual: ".$motor[1][2].".<br>;
```

```
echo $motor[2][0].": Stok: ".$motor[2][1];  
echo ", Terjual: ".$motor[2][2].".<br>;
```

```
echo $motor[3][0].": Stok: ".$motor[3][1];  
echo ", Terjual: ".$motor[3][2].".<br>;
```
